🎯 Professional Summary

Passionate and results-driven Computer Science Graduate with a strong foundation in frontend and backend development, software engineering, data science, database management, SEO, IT support, machine learning, and AI. Skilled in technologies like React, HTML, CSS, JavaScript, and Python, with hands-on experience building interactive websites and deploying intelligent systems.

I enjoy solving real-world problems using technology—whether developing user-friendly interfaces or designing AI models for smart decisions. Currently building a strong portfolio with projects in ERP systems, churn prediction, sentiment analysis, and marketing automation for businesses. Open to freelance and collaborative opportunities.
