Hiring Manager,  
**PowWater**

**Nairobi, Kenya**

I am writing to express my interest in the Fullstack Software Developer (Frontend Focused) position at your company. With strong hands-on experience in modern web and mobile technologies—including **React, React Native, Flutter, Node.js, and SQL**—I am excited about the opportunity to build scalable applications that make a real-world impact.

I have recently completed my four-year degree in **Computer Science**, and I am set to officially graduate in **early October**. During the course of my studies and various personal and collaborative projects, I have built a solid foundation in fullstack development with a keen focus on frontend performance, responsive design, and user experience.

### **What I Bring to the Role:**

- **React & React Native:** Developed responsive and intuitive web and mobile apps with clean component architecture and efficient state management.
- **Flutter:** Built cross-platform mobile applications with smooth UI and native performance.
- **Node.js & SQL:** Designed RESTful APIs and managed databases with optimized queries for fast and secure backend operations.
- **Scalable Development:** Implemented modular code structures, reusable components, and agile practices to support long-term scalability and maintainability.

What excites me most about this role is the opportunity to join a forward-thinking company focused on delivering real-world solutions that drive positive impact. I am eager to contribute my skills to meaningful projects, learn from experienced professionals, and grow within a team that values innovation and execution.

Thank you for considering my application. I would welcome the opportunity to discuss how my background and enthusiasm can align with your team's goals. Please feel free to review my work at: <https://KaheniSatima.github.io/kaheni-portfolio/>

I look forward to the possibility of contributing to your mission.

Sincerely,  
**KAHENI PETER.**
