Dear Wasafiri Team,

I am writing to express my keen interest in the Technical Lead role for the Wasafiri App. With a solid background in software engineering and a passion for leveraging technology to drive social impact, I am excited about the opportunity to contribute to a product that is reimagining access and engagement across Africa.

What draws me to Wasafiri is not only the meaningful vision but also the chance to shape a platform that integrates cutting-edge tools like AI-enhanced customer support, real-time analytics, and secure cloud infrastructure. My hands-on experience with AWS (EC2, RDS, Lambda), mobile stacks like React Native and Firebase, and my commitment to security and scalability uniquely position me to lead the technical roadmap and build a robust in-house team.

A goal I aim to achieve within this role is to implement a personalized, AI-driven self-service support engine that reduces customer wait time by 60% within the first year—blending automation with human-centered design to radically enhance user trust and experience.

I am Nairobi-based and excited to collaborate closely with the leadership team, development partners, and future talent to drive Wasafiri's technical excellence and social reach.

Thank you for considering my application. I look forward to the opportunity to discuss how I can support your mission.

Warm regards,

KAHENI PETER
